

PARALLEL SESSION

SESSION A

4:00 Juan Barranco

" Distinguishing Dirac from Majorana neutrinos through scattering experiments"

4:20 Osamu Seto

" Exotic signatures from the NMSSM with RH sneutrino LSP"

4:40 Koji Ichikawa

" Wino Dark Matter and Future dSph Observations "

5:00 Joel Walker

" Light Gluino Enhancement of Dark Matter Probes in the Vector Boson Fusion Event Topology"

5:20 Selim Gómez

" Jordan–Lie Algebras and Interacting Fields"

SESSION B

4:00 Gustavo Niz

" Massive Gravity Reloaded"

4:20 Oscar Loaiza

"De Sitter vacua and inflation from non–geometric fluxes"

4:40 Carlos Hidalgo

" The signature of General Relativity in Large Scale Structure formation"

5:00 Torres Lomas Efraín

" Constraining preheating after inflation by PBHs over production."

5:20 Miguel Angel García

" Stellar stability in brane–worlds revisited"
